THE SERIES

Art World Sculpt is the flight through the world of the Sculpt series on which it builds: only sculptures, no ground, no nature, black and white. Sculptures of every size float in every position and move as in the original; white squares and edges stand out on the dark bodies.

Fractal clouds of light decide what stands bright in the light and what vanishes into the dark. With every rotation white particles break loose, and clouds of two million particles stream through the space. Art World Sculpt is the counterpart to the figurative Art World series.

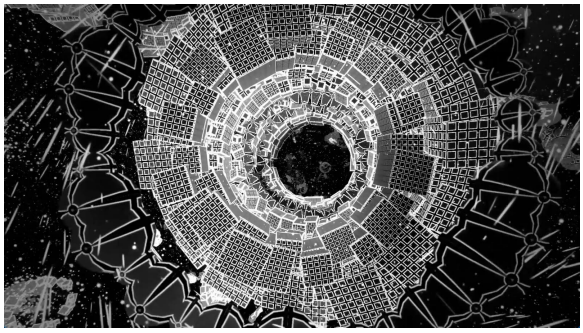

THE WORKS

ART WORLD SCULPT – SKULPTURENFELD

2026

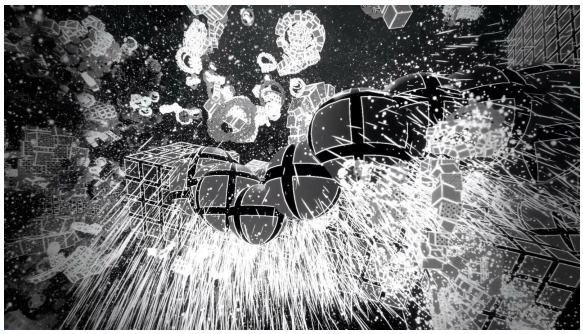

A dense field of sculptures in every size and position – the flight leads right through it, through light and dark.

ART WORLD SCULPT – RINGTUNNEL

2026

The rings of the sculptures become a tunnel: rings of cubes rotate against one another, and the flight winds its way in and back out into the field.

ART WORLD SCULPT – ZEITLUPE

2026

Three times slower: how the white particles break loose from the rotating cubes and spheres and stream away in clouds.
